the environment

SCIENTIFIC PROGRAMME Call for abstracts

12th January 2009

APImondia 2009

A scientific programme of reference for International Beekeeping

From the 15th to 20th September 2009 in Montpellier - France

The coming APImondia 2009 congress, with its focus on current affairs and innovation in the beekeeping sector, is inviting scientists and researchers worldwide to present their scientific works and recent results in all fields concerning the domestic bee: biology – health – role as a pollinating insect – role in human health (apitherapy) – beekeeping technology and economy, and the role of beekeeping in rural development.

The congress is certain to be very exciting, particularly due to the high mortality rate of bees throughout the world: which hypotheses might credibly explain these disappearances, this has truly become a subject of much concern.

To present the results and research projects (oral presentations or posters) concerning the main themes of the scientific programme, log onto:

www.apimondia2009.com – "scientific" section

A dedicated section to submit an abstract

Closing date of the scientific speaker registration: 15th MARCH 2009

REMINDER of the procedure for abstract submission:

1 – Propose your oral presentation or poster, in the "Scientific" section on the website www.apimondia2009.com

2 – Following reception of the Scientific Committee's approval – register as a participant by filling in the individual registration form
